AI-Assisted Development		

PROFESSIONAL EXPERIENCE

Communications Specialist II

Brega Petroleum Marketing Company | Oct 2013 - Present | Benghazi, Libya

- Support internal communication and IT infrastructure, including local lines, VoIP systems, office communication systems, and user-facing technical issues.
- Provide on-site and remote support for Windows computers, office users, hardware/software issues, networks, and communication systems.
- Participated in renewing the company's internal communication network and maintaining reliable technical operations.
- Collaborate with teams to troubleshoot incidents, document issues, maintain service continuity, and support daily operations.

Help Desk Specialist

Social Solidarity Fund | May 2011 - Aug 2013 | Benghazi, Libya

- Provided help desk and technical support for PCs, printers, local networks, Windows, Microsoft Office, and daily user issues.
- Supported hardware/software troubleshooting, user assistance, and routine maintenance for office technology.
- Helped maintain internal incoming/outgoing mail and records archiving workflows.
- Worked with Microsoft Access databases for internal administrative, archiving, and records-related needs.

INDEPENDENT TECHNICAL EXPERIENCE

AI-Assisted Web & Application Development

Independent Projects | Jul 2024 - Present | Remote

- Build websites, landing pages, web applications, SaaS prototypes, and mobile application concepts using Flutter, React, Next.js, TypeScript, and AI-assisted workflows.
- Use ChatGPT Codex, Google Gemini, and Anthropic Claude for coding, debugging, UI development, documentation, content refinement, and iteration.
- Use Firebase, Supabase, cloud databases, and private GitHub repositories; deploy projects through Vercel, Render, GoDaddy, and Libyan Spider.
- Create and refine user interfaces, digital experiences, images, logo concepts, and other visual assets for practical product ideas.
